### PHILIPS SUPPORTS YOU “ON THE GO” WITH NEW NOTEBOOK ACCESSORIES

**Berlin, Germany** – Philips introduces a new range of notebook accessories, designed around today’s mobile lifestyle. Wherever you are, the **Philips Notebook Accessories** range is designed to help you get the most out of your notebook or netbook whether you are working or looking for entertainment. The range consists of notebook sleeves, a Notebook CushionSpeaker, several models of USB speakers, a Bluetooth enabled mouse, a webcam with cable management & direct YouTube upload and a handy presenter – all with a stylish touch of technology.

#### Your notebook on the go

Whether using your notebook for work or play, the heat generated from sustained use can make your legs feel uncomfortable and could damage your notebook. The **Philips Notebook Sleeve** combines a soft cushion for your lap with a hard top to give stability. An extra HeatProtect layer prevents overheating by allowing good air flow - stopping your lap from getting too hot. Damage can also occur in transit so the Philips Notebook Sleeve is lined with a suede-like material and has a rounded, rubberized zip to keep your notebook scratch-free.

#### Use your notebook comfortably

Watching a two hour DVD on your notebook or checking your emails in bed, you always want to be comfortable. So Philips has developed a new **Notebook CushionSpeaker** with a flat top and inbuilt speakers which gives you exceptional sound quality. The soft cushion not only makes things more comfortable for long usage, but also helps prevent over-heating of the notebook and your lap.

### Great sound anywhere, anytime

When outside the office or home you still want to enjoy the music stored on your notebook in great audio quality. The portable **Notebook SoundBar** is simple to use with a single USB cable and can either be clipped to the top of your notebook screen or free standing. The cable neatly wraps around itself and it comes with a carrying pouch, making it easy to slip into your life and your pocket! The **Philips Notebook USB Speakers** are compact, with low power consumption, simple USB plug and cable management, perfect for boosting your bass.

### Smart solutions for working anywhere, anytime

Unfortunately life isn't all play, but Philips want to make sure that the hours you dedicate to work are as painless as possible. You want to be connected and now you can be in control as well as Philips introduce a new **range of mice**.

There is the innovative **Notebook Bluetooth Mouse** with 360° TouchControl. You don't need a working surface for this mouse, navigate comfortably while relaxing on the sofa or in your local coffee house and be in full control of your notebook. Its touch sensor gives you the freedom to move in all directions and it comes with an integrated USB cable for battery recharging. Within the range of Notebook Mice Philips further addresses the need for wireless usage, better cable management and the preference for the traditional scroll wheel.

The new little **Philips Notebook Presenter** will surely become your best friend in professional presentations. This Presenter is not only a laser point to guide the audience through your charts. Wireless, intuitive and featuring gestural control, it works like a mouse in the air. Easy to use, with well designed buttons, just switch to mouse mode and you can control all your files on the projector without going back to your notebook! This intuitive control works with MAC and PC, no software is needed, you just plug in the nano dongle and you're ready to go.
